STONE GALLERY

WHO WE ARE,

Idol Marble is known famously as a reliable company in domestic and international markets with its continuous service since 1989. At Idol Marble, we are proud of sourcing the finest selection of Turkish Natural Stones to our clients from beginning to the end. Our leading business philosophy is to delivery top quality products and exceptional value to our client everytime. Inside of the wide range of products Idol Marble offers, there are some special architectural products such as slabs, tiles, cut to size stairs, worktops, customized skirtings and borders.

Each stone of our collections is painted with the artistry of nature at its best. All our team members are fully equipped with unmatched knowledge about every stone to personally guide you through the process of selection. Integrity, passion and transparency are manifested in everything we do, across all our business partnerships and customer relationships and we give importance these qualities above all else.

Regal Beige

This image shows a close-up of a marble surface with a warm, brownish-beige hue. The texture is relatively smooth with subtle, fine-grained veining and some faint, thin cracks visible across the surface.

Agamemnon

This image displays a marble with a greyish-beige base color. It features a complex, web-like pattern of thin, light-colored veins and fibers, giving it a delicate, spider-like appearance.

Sofita Beige

This image shows a marble with a light beige background. It is characterized by prominent, dark brown and black veins that branch out in various directions, creating a dramatic and intricate pattern.

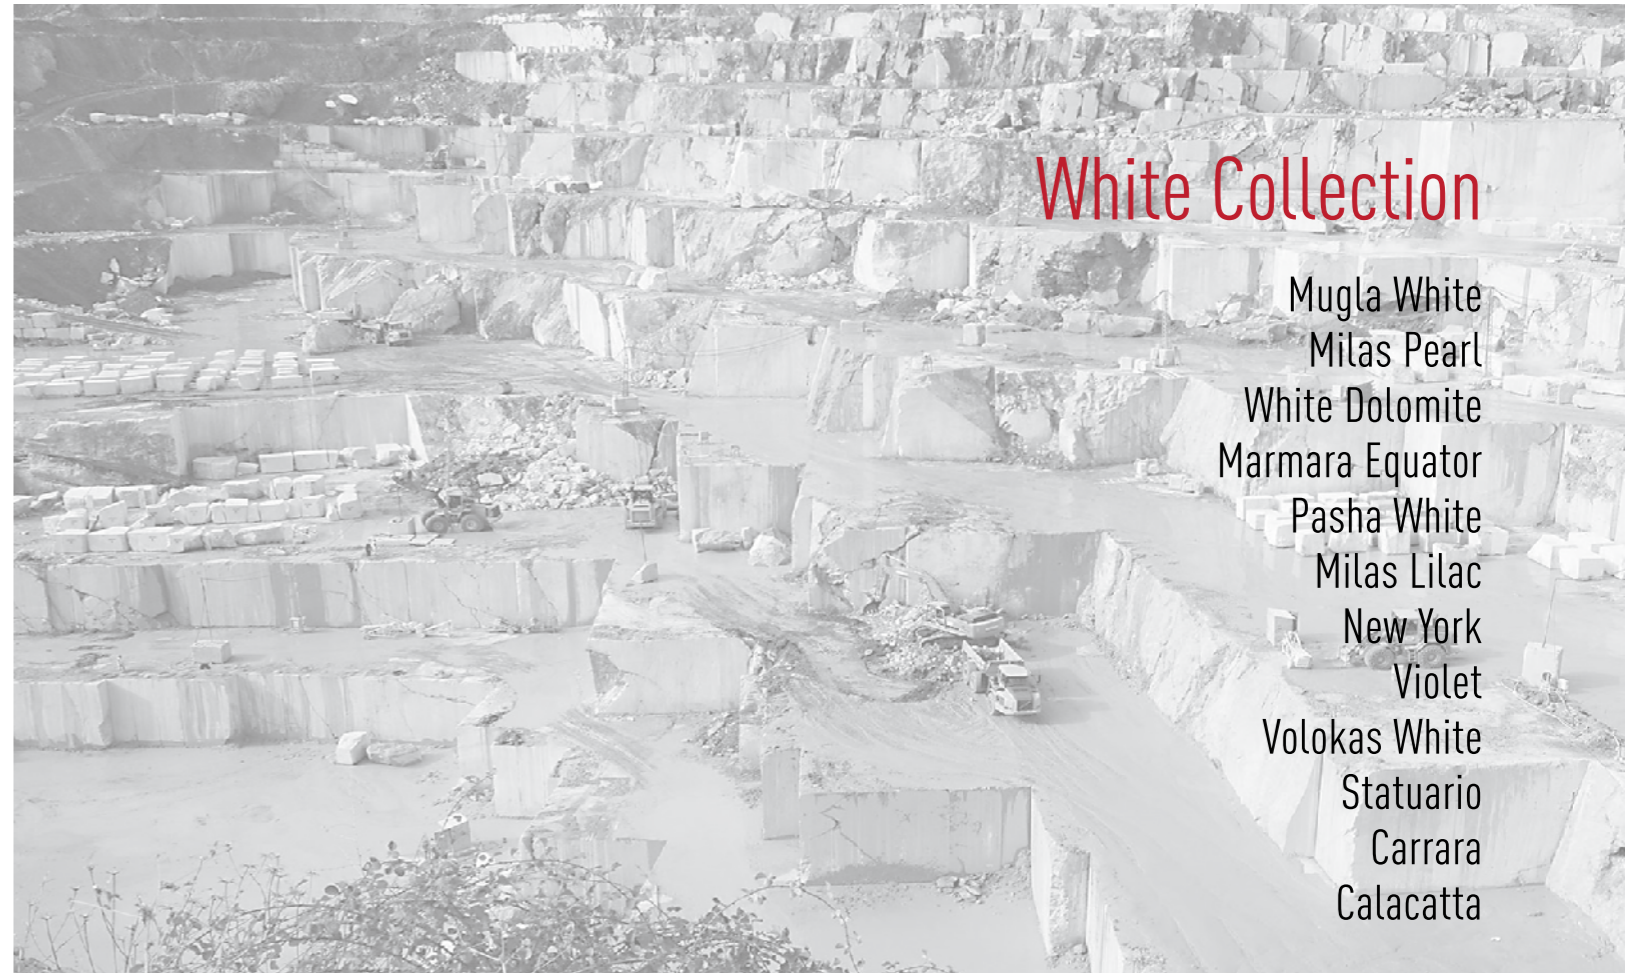

Spider Beige

This image features a marble with a light beige or off-white base. It has a network of thin, dark veins that resemble a spider web, with some thicker, more irregular veins interspersed throughout the surface.

Outstanding and Unusual

The image is a composite of four marble textures arranged in a 2x2 grid. The top-left quadrant shows Volakas White marble with a light, veined pattern. The top-right quadrant shows Carrara marble with a classic white and grey veined pattern. The bottom-left quadrant shows Statuario marble with a light background and prominent, dark grey veins. The bottom-right quadrant shows Calacatta marble with a light background and very prominent, dark grey veins. The text labels are overlaid on each respective quadrant.

Perfect Harmony

The image displays four distinct marble textures arranged in a grid-like fashion, separated by diagonal lines. The top-left section shows a dark, almost black, textured surface. The bottom-left section is a smooth, light grey surface. The bottom-center section features a complex, swirling pattern of light and dark grey. The right side of the image is dominated by a light-colored, heavily veined and spotted texture.

Icon Brown

A close-up photograph of a dark brown marble with intricate, swirling patterns of lighter brown and white veins. The texture is smooth and polished.

Marqueen

A close-up photograph of a green marble with a mottled, earthy appearance. The color ranges from a pale, yellowish-green to a darker, more saturated green, with subtle veining and a slightly textured surface.

Rustic Green

A close-up photograph of a light blue and grey marble with a complex, crystalline pattern. The colors are muted and blended together, creating a shadowy, ethereal effect. The surface has a fine, granular texture.

Aqua Shadow

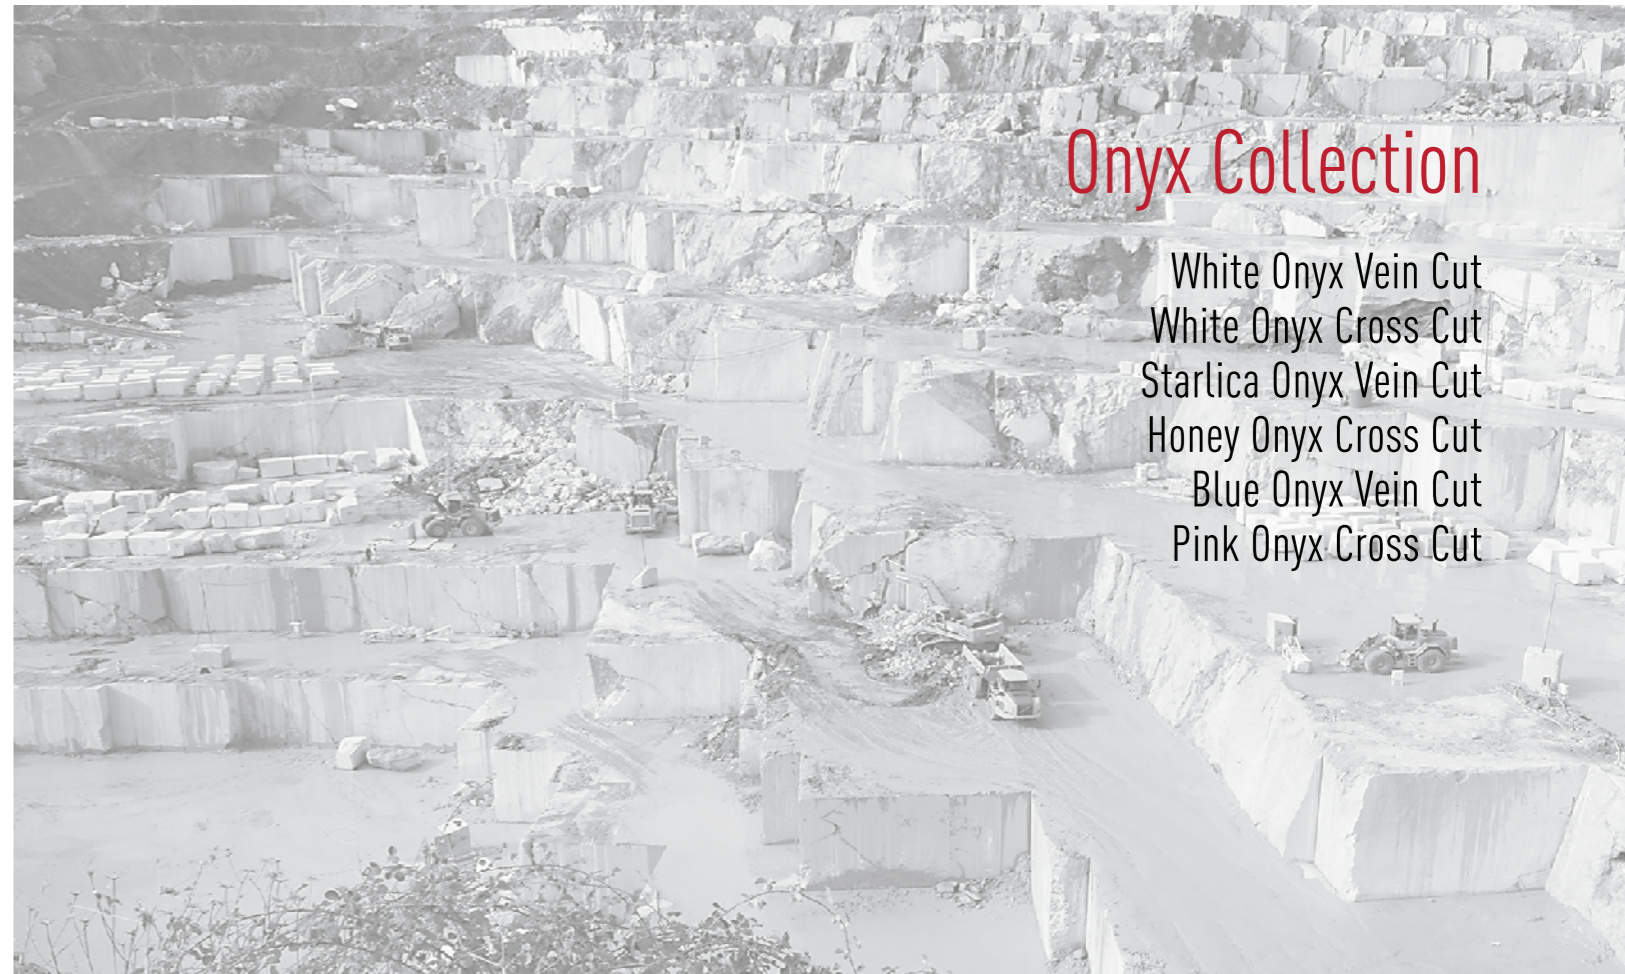

A close-up photograph of a dark, almost black marble with prominent, wavy, silver-colored veins. The veins are irregular and create a dramatic, high-contrast pattern. The surface is highly reflective and polished.
